

Terasaki Project Reference: Volvo foundry at Skövde

Client:
Volvo

Project:
Foundry

Location:
Skövde, Schweden

Since the streamlining towards commercial vehicles was initiated more than ten years ago, the Volvo Group has grown into one of the world's largest manufacturers of heavy-duty trucks, buses and construction equipment and is today also a leading manufacturer of heavy-duty diesel engines, marine and industrial engines as well as engine components for the aerospace industry.

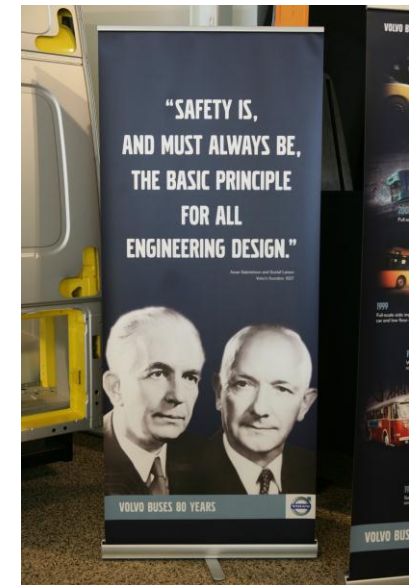

It was Terasaki's privilege to supply Volvo with our circuit breakers for their foundry in Skövde. Safety and protection are the prime purposes of all Terasaki products, which met Volvo's high expectations and requirements.

Volvo Foundry

Volvo Corporate Values

Quality, safety and environmental care. These are three corporate Volvo values that express their commitments.
